GAURAV KUMAR

GAME PRODUCER

Varanasi, India · linkedin.com/in/gaurav-kumar-20492818b · gauravk908567.github.io · gauravk908567@gmail.com +91 7897574277

Game producer with 2.3 years of professional experience and nearly 6 years of making games in unity, owning the full production lifecycle, from product vision and backlog refinement through review cycles and cross-platform launch. Built agile delivery systems from scratch, led a 43-person cross-functional team across parallel development streams, and shipped 13 game titles in 3 months. Currently the producer and developer of an original PC action-adventure game, managing roadmap, playtesting, development and AI-assisted iteration end to end.

Key Strengths

- Coordinated external vendors and partners daily and across time zones, keeping deliverables on scope and schedule.
- Built and ran agile delivery from zero: sprint planning, stand-ups, reviews and retrospectives across Scrum and Kanban, shipping 13 titles in 3 months.
- Tracked performance through KPIs and sprint reporting to leadership and stakeholders.
- Run risk and contingency management and milestone tracking across parallel project streams.
- Real game-community background: years as an in-game leader running local esports and LAN teams in Valorant and Counter-Strike.
- Jira, Azure DevOps and Confluence for planning, tracking and documentation

SKILLS

JIRA and Azure DevOps, Microsoft Wiki, Confluence, SourceTree and GitHub, Unity, Google Analytics

Agile Project Management, Servant Leadership, Analytical thinking, Effective Communication and mediation, Leading Cross-Functional teams, Problem solving and process improvement

PROFESSIONAL EXPERIENCE

PLANET OF TWINS — Game Producer & Developer | June 2025 - Present

Planet of Twins is an original couch co-op action-adventure for PC (Steam), set in a stylized East-Asian fantasy world where two twins share a single life: each player takes one twin. In pre-production from June 2025 and in full production since January 2026, with a playable build in testing. I run it end to end as producer, developer, and designer, and I built it solo with AI assistance. It pitches as Brothers: A Tale of Two Sons meets It Takes Two.

- Led pre-production from June to December 2025: wrote the story and world, designed the core mechanic of two twins sharing one life, and planned the game's systems and architecture before full production began in January 2026.
- Own the whole project end to end as producer and lead developer: scope, roadmap, sprint planning, backlog, playtesting, and milestone tracking toward a vertical slice
- Built the game into a systems-complete playable build at indie-AA scale, over **25+ cross-wired systems**, and wrote the core myself in Unity and C#: dual-twin and couch co-op control, proximity shared-health, a Weaver's Gate rescue, a hybrid GOAP and behaviour-tree enemy AI with an emergent ecology, nine skill trees, and a Setsuna slow-motion time system
- Ran a structured **13 player playtest**, identified **4 critical friction** points, and designed a targeted fix for each, then ran 6 two player test runs on development builds.
- Wrote the full **product narrative** and implemented cinematics in Unity Cinemachine across key story beats, strengthening player motivation and emotional investment in the twin relationship at critical moments in the experience
- Built a formal **Business Case** and **pitch** covering unique mechanics, market positioning, MVP, go-to-market strategy, and a three-milestone roadmap from vertical slice to launch.
- Planned and delivered a two-player **couch co-op** conversion of the solo game in roughly two weeks, an 8-milestone dependency chain (ownership, input routing, per-player dispatch, synchronized joint abilities, co-op UI), enabled by input architecture kept co-op-clean from day one.

- Built **universal controller support** so any USB gamepad works as a first-class device, with device-aware input prompts for each player.

Gamemano - India | *June 2023 – June 2025*

Game Producer

- Spearheaded **end-to-end project delivery** for a 43-person **cross-functional team** of developers, artists, mathematicians, QA, legal, and external sound vendors, owning project scope definition, resource allocation, stakeholder reporting, and vendor relationship management from initiation through production release, resulting in consistent on-time delivery and full stakeholder alignment across all 13 shipped titles
- Pioneered the entire **agile delivery framework** and internal **communication** architecture from zero, establishing sprint planning, daily stand-ups, sprint reviews, retrospectives, and release planning cadences across Agile and Scrum methodologies, accelerating delivery speed by ~90%, cutting cross-team errors by ~80%, and improving overall **team efficiency by ~45%**
- Orchestrated **parallel development streams** across multiple simultaneous project tracks, developing and maintaining detailed project plans covering timelines, milestones, and resource allocation, proactively identifying risks and implementing contingency plans that delivered 13 slot games within 3 months, followed by 10 reskins and a multiplayer casino fish game built over 6 months, across **PC, WebGL, and mobile**
- Tracked project performance through KPIs and sprint reporting, facilitating regular **stakeholder** updates to C-suite, product, and vendor teams on progress, risks, and key milestones, resulting in full organizational transparency and zero unresolved **escalations** throughout the entire delivery cycle
- Recruited, coached, and mentored a growing **cross-functional team** from the ground up, resolving team conflicts, managing team dynamics, and building a collaborative high-performing environment through structured training programs, resulting in a self-organizing team capable of managing parallel workstreams without constant escalation.

GetMega - India | *February 2021 – April 2021*

Game Tester

- Identified and escalated **critical UX** friction points across core player flows during a 100% DAU growth period — **structured** product feedback directly informed feature prioritization decisions that improved D1 retention from 26% to 34%, D7 from 8% to 12% and D30 from 3% to 5%
- Conducted **systematic** analytics-driven testing during a high-pressure public launch phase — supporting **platform growth** from 6.5M to 13.5M registered users through behavioural monitoring and structured test coverage
- Contributed to product-market fit validation and release readiness ahead of a Series A funding round of approximately $9M — helping accelerate the platform's transition from **beta** to **production**-**ready** state alongside a 200+ influencer partnership go-to-market campaign

CERTIFICATES

- Certified associate in project management (CAPM) — Project Management Institute (PMI) | *2024-2027*
- Agile project manager — LinkedIn *2023*
- Project Manager — LinkedIn 2023
- Project Management Skills for Leaders — LinkedIn 2023

PERSONAL PROJECTS

More Unity projects: Action RPG, as producer and level designer in a team of three, and FPP Horror, built solo across the full pipeline.

FAVOURITE GAMES AND HOBBIES

VALORANT, Counter Strike, Rust, Schedule 1, Apex Legends, Overwatch 2, NFS, GTA
Esports (VALORANT, Counter Strike), Outlast, Sports (Football, Badminton etc.)

EDUCATION

U.P. Rajarshi Tandon Open University, Prayagraj | *2019 – 2022* Bachelor of Computer Application
